

CAPABILITIES STATEMENT

ABOUT US

T&W Operations delivers complete RFID inventory, logistics and traceability solutions to the federal government, state and local municipalities as well as the commercial sector. Founded by US Veterans Tom and Wayne in 2004, T&W operations began supporting software and logistics related to bomb interdiction robotics. Efforts resulted in millions of dollars saved annually and more importantly, hundreds of lives were saved due to the traceability of robots and rapid turn around repairs.

We eliminate the problems associated with cycle counts, traceability, picking, shipping and receiving with our patented Tower Inventory System suite of products. Our 3D location capability is a differentiator for T&W Operations, and can be for you, too!

CORE CAPABILITIES

Supply Chain Management and Optimization Utilizing RFID

- Automated Logistics Solutions & Integration Including RFID Implementation With 3D Visibility
- Patented RFID hardware and Software Systems

Software solutions to include

- Law Enforcement Asset Management
- Office Asset Tracking System
- TIS & TIS GO

Program and Project Management Support

CORE SYSTEMS

Solution Support Integration

- Business Process Support
- On Hand Subject Matter Experts
- End to End solution support

Hardware

- Tower Inventory System (TIS)
- Portal, Forklift and Tunnel Systems
- Handheld Kit Solutions

Software

- dashboards
- Third party Software Support
- Project Portals for Enhanced Visibility

All Projects Include

- Training (online)
- Annual Software Licensing with Continuing Upgrades

CERTIFICATIONS

ISO 9001: 2015

PAST PERFORMANCE

Government/Federal:

T&W Operations was contracted to Implement our patented RFID Tower Inventory System into multiple government facilities in support of inventory management and logistics of critical military assets.

The efforts required T&W to provide the Tower Inventory System, TIS software and RFID handheld kits including RFID capable printers.

T&W's Tower Inventory System provides 100% accuracy in inventory, reducing wall to wall inventory hours from over 2,000 hours to 16 hours. TIS Software provided a database for inventoried items containing the items location, part number and other unique identifiers, along with an API linking the data to the customer's WMS. In the end, ROI in less than 12 months, which is typical.

Law Enforcement:

T&W Operations was contracted to implement our patented RFID inventory solution to the 19th Drug Task Force located in Montgomery County, TN in support of inventory traceability of confiscated items.

The effort required T&W to provide Tower Inventory Software, RFID handheld kits including RFID capable printers.

T&W is providing a 100% accurate Chain of Custody from the moment the evidence is logged in, tagged, and cataloged into the MGSD drug task evidence locker. T&W Operations complete solution saved manpower. It also may save a verdict by providing chain of custody for every piece of evidence. There is no missing evidence EVER!!!!
